Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Serial Number: 10/051242

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to pressure vessel with joinder ring, classified in class 220, subclass 592.
- II. Claims 12-16, drawn to pressure vessel with end fittings, classified in class 220, subclass 589.
- III. Claims 17-23, drawn to a process of making of joining shell sections together, classified in class 264.
- IV. Claims 24-28, drawn to a process making a vessel with a joinder, classified in class 264

The inventions are distinct, each from the other because:

Invention I and inventions II and III are unrelated. Invention I does not rely upon the specific end fitting and the process of joining section for patentability.

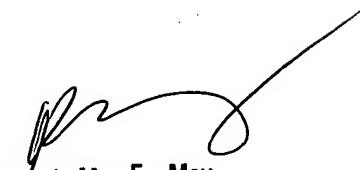

Inventions I, II and III, IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case invention I can be made by joining the joinder together by ultrasonic welding but not the specific process of invention III and IV. The process invention III can be used to make any filament wound container without the joinder and the end fittings.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this office action will be directed to examiner Joseph Moy, (703) 308-1145.
